Learning

PHP, AngularJS, Node.JS, After Effects, Word Press, SQL

Education

Advanced Diploma of Web Design and Interactive Media
Humber College Institute of Technology & Advanced Learning
2013 - 2016 (expected)

School Projects

Ace (App Design Concept) - 2016

UI designer on class project to create LinkedIn connected meet up app to help you meed up with people at businness events. Using photoshop I created a mockup of the UI and then as a group we presented our idea to a group of industry insiders.

Cooking Time (App Design / Development) 2015

School project as "capstone". This project's goal was making app that suggest everyday's meal. Coded by Angular JS with Ionic Framework based, brought data from Big Oven API.
I learned by myself how to use these programming by using lots of online schools, tutorials, documents.

Experience

Bijyu (Web design) - 2017

A new design concept for a local news blog website from Hokkaido, Japan. Designed by PSD, based on the original website layout and colour scheme. This work won in a web design competition of crowdsourcing service.
